New Outdoor Product 2022

For the first time, architects and designers from different backgrounds collaborate with Gervasoni to create collections that range broadly into the world of outdoor furnishings. The use of traditional outdoor materials, as well as the most-advanced innovative materials - perfect to resist to both weather agents and time - make it possible to create products and collections that can interact with each other to give life to combinations that are new and personal each time, in order to create one's own outdoor space, free of any style limitations.

Focus on new materials

The Gervasoni outdoor collection is the result of a careful selection of natural and technical materials, all skilfully crafted by expert hands and innovative technologies. The range of finishes, materials and fabrics allows the personalisation of outdoor spaces without any restrictions on style. Among the materials introduced with the new outdoor collections we find Millgres and nautical rope:

Millgres

The resistance to weather agents and to humidity makes Millgres a perfect material for the outdoor world. Furthermore, the easy maintenance thanks to its stain-proof qualities and ability to be washed with common detergents make it also suitable to be used for foods.

Nautical rope

The weave is made by hand with polyester rope covered in acrylic fibres. Resistant to water and to direct sunlight, the nautical rope is a material resistant to deformation and even when wet, it is not less resistant to repeated stress.

Mudra Art Cuisine

The Mudra Art Cuisine restaurant in the Hotel allows guests to enjoy the sunset from the terrace overlooking the gulf, which offers a truly breathtaking view. Gervasoni's InOut tables with a teak top and blue ceramic legs, recalling the stunning shades of the bay, adorn the space, accompanied by the somewhat austere elegance of the Gray chairs. The space is completed by a selection of handmade blue and white ceramic decorative accessories from the InOut collection.
