BRASS / TABLE, Paola Navone

The eclectic spirit of Gervasoni can clearly be seen in the BRASS family of coffee tables, characterised by a sculptural look and feel. They are made with the base in cast iron, a column in ebony-stained beech, and a top available in cast aluminium or polished brass, materials that denote an ability to embellish the interiors thanks to their luminous reflections, either cold and silver or warm and golden. Available in different sizes and heights.
