ECO / RUG,
Elena Sanguankeo

The project is the result of profound research pursued by the company together with the designer. Rugs were initially designed and made on a manual shuttle loom before being developed on a radically re-adapted industrial loom to create patterns with an artisan look. Elena Sanguankeo transfers all her experience in the world of haute couture to the Echo collection, weaving different yarns, colours and stitches. The synthesis of tradition and innovation is also palpable in the choice of materials: jute and polipropylene are both suitable for outdoor use and are water resistant.

Sizes: 170 x 300 cm
Fiber: 38% PP, 32% PC, 14% JU, 12% CA, 4% PL
Technique: Weaving Loom
Type: Chanel
Thickness: 5 mm
Valid for outdoor use.
Dry cleaning not recommended.
Hang to dry.
Wet cleaning.
