INOUT / FAUTEUIL,
Paola Navone

Enveloping and comfortable armchair, Inout 707 has a semi-circular slatted structure, with legs that intersect to form a cross: it is made of oiled Iroko, particularly durable wood because it is naturally resistant to water and moisture. The contrast between the solidity of the wide slats and the softness of the removable loose cushions in water-repellent polyurethane foam, give character to this piece of furniture.

Iroko: Iroko wood is a particularly hard species from the forests of tropical Africa. Being a resinous wood, it is naturally protected against water and moisture. It features impressive mechanical qualities, such as resistance to bending. Iroko wood used for this collection is a solid wood stabilized in drying ovens and oiled afterwards. Cleaning instructions: use a soft damp cloth.
