INOUT / TABLE, Paola Navone

Family of tables with a classic form, single leg and square top with rounded corners. Concrete top, cross-shaped base with central column embossed painted tubular aluminium.

Tops are finished with protective coatings, that never make the surface impervious, but are useful to slow down absorption of liquids. Cleaning: use water and a neutral detergent on the surface. Avoid direct contact with aggressive chemicals substances, solvents, ammonia, inks, oily soaps, lemon, wine, coffee. In case of contact, rinse the surface immediately and thoroughly. Concrete: Tops made from a mixture of cement, polyurethane resin and glass fibre that guarantees an optimal balance of strength, flexibility and durability. Tops made from this composite are additionally protected with a highly resistant two-component polyurethane resin that provides superior protection against wear and stains. Aluminium: Aluminium offers stability over time, resistance to the weathering and easy maintenance. Moreover, it is recyclable and can be reused an infinite number of times without the slightest alteration of its technical and mechanical properties. Aluminium is processed with a powder finish, after a saline-proof treatment that inhibits the natural oxidation of this material. The subsequent powder-coating process increases resistance to corrosion while also protecting the metal against scratches and chipping.
