THE ALCHEMY OF CREATING  
THE PERFECT MAGICAL  
ONBOARD AMBIENCE

**Prisma** has created a professional freestanding cocktail station for indoor and outdoor use. Made of AISI 304 stainless steel, it is available as a unit or built into a bar counter

Created in 1976, but still contemporary thanks to the purity of its geometrical form by Vico Magistretti, the Sonora lamp by **Oluce** is a well-established favourite. Now available in a range of versions and sizes

The flagship model in the indoor collection by **Gervasoni**, the Loll sofa, designed by Paola Navone, is now offered in a new, modular version. Elements of different depth and angles enable the creation of personalised layouts

The skilful leather weave is highlighted in the Belvedere console table, with broad strips woven around an aluminium structure with a solid wood top. By **Rabitti 1969**

Inspired by **Secondome's** study of the relationship between artisanality and technology, the items in this furniture collection are also sculptural works. One of these is Settimio, created by cabinetmaker Stefano Marolla, a chest of drawers combining art and design
